. i have used this one, but unfortunately its not working. is2b1: its not advised to run out of disk space !testdisk | BrokeDow  
BrokeDow: sudo touch /forcefsck && sudo shutdown -r now || sudo apt-get install -y -f install testdisk && sudo testdisk /dev/sda && sudo parted -l && sudo fsck /dev/sda5 && sudo shutdown -r now What is the keyboard shortcut for logging out of the current session? I have no idea what to type into the terminal Please, can someone tell me the shortcut for logging out of the current session? guys can i just install ubuntu or i must re-install all my system packages ? mehdi\_, from the livecd FoolsRun: i remember checking on the "Desktop" settings, but there was a shortcut for it - and it's been a while. zykotick9: ok, I have Ubuntu 10.04 FoolsRun: How to download the source of a package which doesn't have a apt-get source ?? bazhang: i tried to install ubuntu but it hangs on purple screen after reboot. i also tried to enter live system (when i press f6 for settings) and change boot to nomodeet (i didn't know how to do that) i can't do anything after that it just stays like this. i am on 10.04 desktop

---

version. For example how to download the source code of postfix there is no apt-get source of postfix Ankur\_Agarwal:
